System for providing product advisory information for web-based sales application has correlation engine retrieving pricing, advisory and catalog information via...

Abstract (Basic):

... System relates to dynamic generation of web pages having context-specific content based on user requirements and information available about products and solutions that best fit the user requirements.

...user of the best choice based on user need. It enables correlation of both pricing information and product specifications and feature

sets in order to determine which products best satisfy the user requirements and provide the user with a ranking of the **correlated products** . It enables the user to purchase products directly from the same source of the price

AU 200076299 A G06F-017/60 Based on patent WO 200111532

Presentation method for showing products for comparison asks customer to select product features most important to him from product features list, and presents table to customer crossing selected features against available products . Ordered hierarchy prompts customer to answer multiple choice question and presents products in descending order of relevance based on customer response. Customer can select to view details of each available product.

Abstract (Basic):

... Method prompts customer to select **product features** most important to him from **product features** list, and presents table to customer crossing selected **features** against available **products** . Ordered hierarchy prompts customer to answer multiple choice question and presents products in descending order of relevance based on customer response. Customer can select to view **details** of each available **product**.

... Independent claims describe a method for presenting alternative **products** for **comparison** , a computer program for presenting alternative **products** for **comparison** , a computer data signal, a web server and a method in which alternative products are...

...As a method for presenting alternative **products** for **comparison** to a

customer...

...Customer **need** not investigate each **available** good or service in detail before arriving at a purchase decision...

ABSTRACT

PROBLEM TO BE SOLVED: To efficiently provide **available real** estate properties to a person who **wants** to use **real** estate properties.

SOLUTION: This **real** estate property retrieving system comprises a real estate property provision information receiving means for receiving...

... for storing the real estate property use information, a real estate property retrieving means for **comparing items configuring** the real estate property **information** with **items** configuring the real estate property use request conditions, and for retrieving the real estate **properties** whose **items** are matched, and a real estate user **information** retrieving means for **comparing items configuring** the real estate user **information** with the **items** configuring the real estate provision request conditions, and for retrieving the **real estate property user information** whose **items** are matched.

AUTOMATIC GATHERING MANAGEMENT DEVICE FOR ACTUAL DEVELOPMENT RESULT

PUB. NO.: 08-030676 [JP 8030676 A]

PUBLISHED: February 02, 1996 (19960202)

INVENTOR(s): KUMASHIRO JUNJI

APPLICANT(s): FUJITSU LTD [000522] (A Japanese Company or Corporation), JP (Japan)

APPL. NO.: 06-159862 [JP 94159862]

FILED: July 12, 1994 (19940712)

INTL CLASS: G06F-017/60

ABSTRACT

PURPOSE: To easily **compare** and analyze **development** information on a project by automating gathering and analyzing operation for **actual** development result data which **requires** much labor and a long time, making the units of the gathered data and other...

...classifies data obtained as the actual development result data among the operation data according to **item information** using defined operation **item** names and unit names as key words and automatically totalizes the data. An actual development result data editing process part 4 edits and processes the totalized data at **need**. The **actual** development result data are saved in an **actual** development result data file 9 in predetermined format by an actual development result data saving...

Abstract: Tests of five distributed load-balancing solutions revealed some surprising similarities. **Products** tested were Alteon WebSystems' WebOS on its Aceswitch 180 and Acedirector 3, Coyote Point Systems...

... five products evinced management troubles. Clearly, this is still an emerging technology. But if you **need** to create a highly **available** Web site out of geographically dispersed sites, this batch of **products** is worth a look. A cut above the rest, F5 and RadWare provide a standalone...

Abstract: Purchase decisions are determined largely by two factors, buyer **needs** and preference and an awareness of what **products** are **available**. In making a project management software selection, buyer **needs** must be clearly understood and then **compared** with **available products**. This paper examines the process that a Kodak line of business took in 1988 to...
